

WORKBOOK

2021-2022

WE ARE XION.
BORN IN THE WORLD
OF STUNT PERFORMERS.
WHERE A SPOTLIGHT
ISN'T NEEDED
TO PUSH OURSELVES.

OUR PROTECTIVE GEAR
IS MADE FOR ACTION,
DOES WHAT IS NECESSARY
AND KEEPS US GOING.

WE WORK HARD
TO DO WHAT WE LOVE,
FOR AS LONG AS WE CAN.

WE ARE XION.
GET UP,
DON'T STOP,
TAKE THE HIT.

FLEXIBLE IMPACT PROTECTION **DESIGNED BY STUNT PRO'S**

Doing what you love is important. Being able to do it for a long time is even more essential. As stunt professionals, pushing our bodies to the limits over and over again, we know all about it.

Born out of necessity and tested in practice with enormous support from fellow stunt performers, police departments and athletes all over the world, we are confident we've designed the ultimate impact protective gear.

FULL FREEDOM OF MOVEMENT, TOTAL CONTROL AND A LITTLE BIT OF D30® MAGIC

LOW-PROFILE

Whether you're a pro or just starting out, protection is best when you don't feel like wearing it. XION® protection is low profile, highly breathable and can be worn easily underneath any other layers. You'll forget you're wearing any. So, reduce the bulk and take the hit.

MODULAR

You have total control over what to protect and when to protect it. Every pad comes in a pocket, so take it out when being extra light is more important than the extra protection. On top of that, all separate XION® gear can easily be combined with each other.

FLEXIBLE

XION® gear is designed to move and bend with every hit. The main 4-way stretch fabric is strong and breathable to deliver a fit that feels like second skin. Special areas are covered with a durable abrasion resistant fabric for extra support or a mesh fabric for extra breathability.

MADE IN EU

Our gear is functional Dutch design completely made in the European Union. Sourcing and production in England, France, Germany, Italy, Poland, Spain and Switzerland. Design, assembly and packaging is all done at our headquarters in Amsterdam, the Netherlands.

POWERED BY D30®

XION® gear is powered by D30's groundbreaking impact protective technology, offering the thinnest and most advanced shock absorbing protection against blunt trauma.

1.
SOFT &
FLEXIBLE

2.
LOCKS
ON SHOCK

3.
RETURNS TO
FLEXIBLE STATE

D30® is a patented technology with a unique molecular structure allowing it to remain soft and flexible. On impact, D30's molecules lock together, which absorb and dissipate the impact energy and reduce the force transmitted.

We were amongst the first to implement D30's patented technology into protective garments. This early partnership contributed in the creation of innovative gear, based on both science and field experience.

THE RIGHT AMOUNT

There is no compromise when it comes to protection. However, there is a level of efficiency and proficiency. There is no need to overprotect and to lose only on flexibility. That is why we thoroughly consider the type of pad, it's placement and certification levels.

D30® PAD OVERVIEW

The best protection doesn't mean the most protection. Nor the thickest. It's the protection most optimal for your specific needs. We use different D30® pads in our garments to provide you with the most flexible, low-profile and lightweight gear there is.

[Click on the pads for more information](#) ✖

D30® BP4 L1
BACK PROTECTOR

CE certification: EN 1621-2 Level 1	Thickness: 16 mm
---	----------------------------

- Special features:**
- Certified for use at temperatures down to -20 °C.
 - 34% more breathability than the next best competitor on the market.

D30® LP1
LIMB PROTECTORS

CE certification: EN 1621-1 Level 1	Thickness: 11 mm
---	----------------------------

- Key features:**
- Tri-ventilation technology with a 45% improvement in breathability.
 - Suitable for use in hot (+40 °C) and cold (-10 °C) conditions.

D30® CP1 L1
CHEST PROTECTORS

CE certification: EN 1621-3 Level 1	Thickness: 11 mm
---	----------------------------

- Key features:**
- Winged design and geometry combination provide maximum ventilation and protection for the 2-wheel market.

D30® VIPER STEALTH
BACK PROTECTOR

CE certification: EN 1621-2 Level 1	Thickness: 11 mm
---	----------------------------

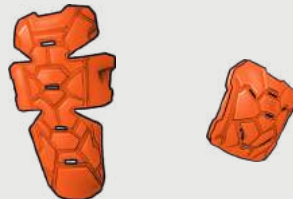

- Special features:**
- Certified for use at temperatures down to -20 °C.

D30® VIPER PRO
BACK PROTECTOR

CE certification: EN 1621-2 Level 2	Thickness: 18 mm
---	----------------------------

- Special features:**
- Maximum protection in terms of transmitted force during impact.

D30® T4 RANGE
VARIOUS PROTECTORS

CE certification: <i>Not certified</i>	Thickness: 7 mm
--	---------------------------

- Key features:**
- Extra thin and flexible for optimal freedom of movement.

D30® P & CRASH RANGE
VARIOUS PROTECTORS

CE certification: <i>Not certified</i>	Thickness: 8 mm
--	---------------------------

- Key features:**
- Small in size, yet essential pads.

FREERIDE RANGE

ON THE HUNT FOR A NEW TRICK,
LEARNING THE SPORT OR MASTERING
YOUR MOVES, GO AS FAST AND LIGHT AS
POSSIBLE WHILE STAYING PROTECTED ON
THE ESSENTIAL PLACES ONLY.

LONGSLEEVE JACKET FREERIDE MEN

LSJ-30112-M Men's ♂

Ideal all-round upper body protection with an adjustable waistbelt and thumb loops for an extra tight fit. With its D30® Viper Stealth back pad, this base layer is specifically designed to use in cold conditions.

Weight: 1,7 kg
Sizes: S - XXL
D30® pads (6):

SIZING CHART

MEN / UNISEX

HOW TO MEASURE?

Measure specific areas tightly and not over clothing. Also keep muscles in a relaxed state.

When measurements are in between sizes, we recommend to choose the smaller size.

CHEST:

Around the widest point of the chest, under armpits and over the shoulder blades.

BUST:

Around the fullest point of the bust, under armpits and over the shoulder blades.

UPPER ARM:

2,5 cm [1 inch] above the widest point of the muscle.

WAIST:

Above the hipbones and across the belly button.

HIP:

Around the widest point of the hips.

UPPER LEG:

At the widest point of the leg, approximately 7 cm [2.8 inch] below the crotch.

ABOVE KNEE:

Approximately 7,5 cm [2.9 inch] above the knee cap.

BACK LENGTH:

From the most prominent bone at base of neck to the waistline just above the hipbones.

1. CHEST

cm	88 - 92	96 - 100	104 - 108	112 - 116	120 - 124

MEET OUR XIONEERS

Decades of collaborative stunt expertise is found in the XION® garments. What started as a solution for stage and screen performers, expanded to snowy mountains and far beyond.

Nowadays, XION® protective gear is used by stunt professionals, pro athletes, search & rescue teams, law enforcement operators and defence specialists all over the world.

We continue our craft and passion to let anyone take the hit.
